“A Leader is one  
who knows the way,  
goes the way, and  
shows the way”.

John Maxwell

**ClubsNSW**

BRONZE CORPORATE PARTNER

The Leadership Excellence program is designed to identify and nurture the qualities of the staff demonstrating leadership qualities at all levels within the organisation and are open for consideration in the venues' development program for succession planning. The program also realigns serving team leaders and supervisors by identifying and driving the triggers for performance management, rekindling and creating the passion that defines their contributions and value systems in line with corporate objectives.

Temperament, ability, desire and skillsets of individual participants is assessed in line with their career expectations ensuring further training and development gaps are identified.

The training focus is on developing the skillsets for managing frontline staff and working through the pillars of organisational leadership, management, command and control.

This is to ensure that their leadership journey is aligned with corporate vision, mission and goals. They then need to apply these strategies to maximise team and individual performances, applying the tools provided to deal with generational diversity, staff personality traits and alignment of communication pathways.

Leadership Excellence is about developing the individual to achieve their fullest potential and creating future leaders aligned with your corporate objectives.
